Kelowna Manlift Operator Certification

Kelowna Manlift Operator Certification - We offer a scissor platform and aerial lift certification and training to empower the trainee with the general understanding and knowledge of the safe and efficient operation of "Power Operated Mobile Work Platforms," in accordance to the existing regulations in the industry. Upon successful completion of training, the participants would be able to understand and know specific health and safety related hazards connected with utilizing aerial and scissor lifts.

There are a variety of affiliated places in your district providing Manlift Operator Certification Programs. Trainees are provided with in-depth instruction on safe utilization and regulations along with extensive hands-on training. The skill level and knowledge of each person training is assessed and those who are capable of demonstrating a satisfactory level of operational competence would be given Operator Certification cards and employee documentation.

Theory Training
The trainer guides trainees through a comprehensive and interactive review throughout the theory training. The operator course book is studied that includes all applicable regulations. Other topics like safe operating procedures, various machine kinds in addition to various associated applications and sizes, pre-use inspections and general work place safety are individually explored.

Theory Evaluation
The evaluation of the theory parts begins with a written exam, which focuses on the course concepts that was included in the reference handbook. Tests are graded and returned to the trainee. After that the exams are reviewed to ensure understanding and a minimum score of 70% is considered necessary in order to pass this portion of the training.

Practical Training
The hands-on part of the program is covered in the practical training. Here, trainees are shown the safe operating procedures, the shutdown and parking procedures and the pre-use check measures. Each one training has the chance to operate the machine and practice the skills they learned throughout Theory Training under the helpful eye of the course trainer in a setting which is safety controlled.

Practical Evaluation
The assessment of the practical portion is where the trainee is evaluated as to whether they have the minimum level of skill. Trainees are individually tested on their skills utilizing the machinery in a somewhat challenging course environment. After the evaluation is complete, the ones training are de-briefed and given the chance to deal with whichever problems they might have about whatever portion of the program. Each successful trainee's employer will be given the official records and documents immediately after the program has been completed.
