Kelowna Crane Training Schools

Kelowna Crane Training Schools - We have designed lots of Mobile Crane Operation programs at our Crane Training Schools. These programs are recommended for the experienced operator who requires re-certification or certification, and for inexperienced operator who is looking for work in the industry. Crane operator positions are high because of their high pay. Crane operators are among the highest paid of any operator of heavy machinery.

Our Crane Operator training offers instruction for a variety of mobile cranes. Course subject comprises Wire Rope, Crane Set-up, Lift Planning, Load Dynamics, Rigging, Signaling and Load Charts.

The program is best for crane riggers, operators as well as their supervisors. The materials incorporated in the course will comprise a manual and various informative handouts. The safety manual that is illustrated features one hundred to two hundred fifty pages, depending on the course, of helpful and vital material. Course materials comprise load exercises and load charts for the crane with which the individual training is working.

More than half of the course consists of Hands-On Safety Training. Practical training is useful for developing and increasing personnel skills levels. Only certified journeyman crane instructors are selected to teach the courses. Our instructors possess numerous years of practice in the industry.

Optional testing mechanisms are provided for all of our courses. Students will normally write tests both prior to and following training. A skills test is normally administered for programs which comprise H.O.S.T. People training would be graded and tested.

Certification Training Programs: Lattice Boom/Crawler Cranes; Fixed and Swing Cab Mobile Hydraulic Cranes; Articulated Boom/ Knuckleboom Cranes; Rigging / Signalperson Certification and Training; In-The Seat Training and Certification & Testing.

Business standards of practice are evolving as new business requirements surface. There are constant updates to regulations and legislation. Enhancements in technology and equipment continue to be made. Industry data analysis and collection detect trends which are changing. Members maintain the advantage of managing their certifications and training programs. Mobile device alerts keep members ahead of personal and workplace safety news.
