Wheel and Track Loaders

This Wheel and Track Loader Certification Program will teach a student how to safely operate and inspect all aspects of the machine. Some of the topics discussed in the program are:

1. Wheel and Track Loader Operation

2. Safety Guidelines

3. Safety Hazards

4. Securing Loads

5. Transporting Loads

The comprehensive Wheel and Track Loader Course will involve both in-class and field operation training. In order to complete the program a student must be able to accomplish the following tasks:

1. Properly inspect the Loader prior to operation

2. Properly determine whether the work site is safe for operation

3. Properly load and safely transport materials

4. Be able to pass a quiz based on the in-class training materials

Each class will generally range in size from 6-10 people and can be successfully completed by experienced operators in one 8 hour day.

---

2) WHEEL AND TRACK LOADER: RE-QUALIFICATION TRAINING
It is essential that you always remain certified to safely operate the machine. The refresher program ensures that you are kept up-to-date on all of the new regulations and safety standards. The program is designed to be completed in a quick 4-5 hours course. Both in-class and field operations will be a part of the training.

---

3) WHEEL AND TRACK LOADER: IN-HOUSE INSTRUCTOR TRAINING
This instructors training course for Wheel and Track Loaders is a very comprehensive course that will allow the student to become certified to train people in-house. Some of the materials that will be discussed are:

1) Introducing the student to the principles of safe ope!
ration

2) Ensuring the student can present the in-class portion of the course
3) Ensuring the student can properly identify good operating techniques
4) Showing the student how to properly design a test area
