Skid Steer Loader

This skid steer program will introduce a student to safe work procedures involved with operating skid steer loaders. Some of the subjects covered include:

1. Safety Guidelines and Safety Hazards

2. Skid Steer Loader Operations

3. Transporting and Securing Loads

During the program a student will learn how to safely operate a skid steer loader, while ensuring they are competent at securing cargo, transporting heavy equipment, in addition to becoming well versed at estimating loader production.

Skid Steer Loader Course Structure:

The course will consist of hands on training and a written practical exam. Students will be graded on their ability to perform the following tasks:

1. Inspecting the work site for hazards

2. Daily inspection of the Skid Steer Loader

3. Safe and proper operation of the machine

4. Successful completion of the written examination

The **entire course will take between 8-16 hours** depending on your current experience level. For experienced operators, the course will take 8 hours. For novice operators the course will take 16 hours.

---
