

Skid Steer Loader

This skid steer program will introduce a student to safe work procedures involved with operating skid steer loaders. Some of the subjects covered include:

1. Safety Guidelines and Safety Hazards
2. Skid Steer Loader Operations
3. Transporting and Securing Loads

During the program a student will learn how to safely operate a skid steer loader, while ensuring they are competent at securing cargo, transporting heavy equipment, in addition to becoming well versed at estimating loader production.

Skid Steer Loader Course Structure:

The course will consist of hands on training and a written practical exam. Students will be graded on their ability to perform the following tasks:

1. Inspecting the work site for hazards
2. Daily inspection of the Skid Steer Loader
3. Safe and proper operation of the machine
4. Successful completion of the written examination

The **entire course will take between 8-16 hours** depending on your current experience level. For experienced operators, the course will take 8 hours. For novice operators the course will take 16 hours.

2) SKID STEER LOADER: RE-QUALIFICATION TRAINING

In order to ensure that you stay up-to-date with the current regulations and safety standards, we offer a comprehensive re-qualification course. The Skid Steer Re-Qualification course will take between 4 and 5 hours to complete.

3) SKID STEER LOADER: IN-HOUSE INSTRUCTOR TRAINING

Once a student completes the Skid Steer Loader Instructor Program he/she will be able to effectively train his/her own corporate employees. The course covers a wide range of topics!

including:

- A) National and Provincial Safety Standards
- B) Theory
- C) Hands-on Instruction
- D) Functions and Controls of the Machine
- E) Steering and Maneuverability of the Machine
- F) Skid Steer Inspection
- G) Safe Load Handling Techniques
- H) Principles of Stability

The course will take roughly 16 hours (2 days) to complete.
