

Clark Forklift

Performing worldwide, there are currently 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those in service in North America. Clark has five main lines of lift trucks across the world, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive designs of lift trucks, with components covering more than 120,000 particular components for all of its automated equipment. Your regional Clark Dealer is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark's extraordinary Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to provide the highest level of value and service to our clients, Clark remains on the leading edge when it comes to improving productivity and benefiting performance.

Worldwide, Clark has one of the most outstanding dealer support networks. With over 550 locations globally, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the material handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is now a standard feature on every forklift.

Clark's recurrent goal to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift maker across the globe to be certified with the globally approved quality standard ISO 9001 for each and every one of their manufacturing facilities. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Supply Efficient Production

Clark has chosen the system of "Lean Manufacturing" at all of its assembly plants because this system is particularly economical and permits minimal use of resources. Developed to guarantee maximum efficiency, this system is intended to find and acknowledge the most effective methods for manufacturing plant management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working together, Clark's product suppliers and engineers communicate towards improving product efficiency while minimizing expenses. The new value engineering program combines innovative product development and offers improved consumer support and service within the industry.
