

Wheel and Track Loaders

This Wheel and Track Loader Certification Program will teach a student how to safely operate and inspect all aspects of the machine. Some of the topics discussed in the program are:

1. Wheel and Track Loader Operation
2. Safety Guidelines
3. Safety Hazards
4. Securing Loads
5. Transporting Loads

The comprehensive Wheel and Track Loader Course will involve both in-class and field operation training. In order to complete the program a student must be able to accomplish the following tasks:

1. Properly inspect the Loader prior to operation
2. Properly determine whether the work site is safe for operation
3. Properly load and safely transport materials
4. Be able to pass a quiz based on the in-class training materials

Each class will generally range in size from 6-10 people and can be successfully completed by experienced operators in one 8 hour day.

2) WHEEL AND TRACK LOADER: RE-QUALIFICATION TRAINING

It is essential that you always remain certified to safely operate the machine. The refresher program ensures that you are kept up-to-date on all of the new regulations and safety standards. The program is designed to be completed in a quick 4-5 hours course. Both in-class and field operations will be a part of the training.

3) WHEEL AND TRACK LOADER: IN-HOUSE INSTRUCTOR TRAINING

This instructors training course for Wheel and Track Loaders is a very comprehensive course that will allow the student to become certified to train people in-house. Some of the materials that will be discussed are:

- 1) Introducing the student to the principles of safe operation
- 2) Ensuring the student can present the in-class portion of the course
- 3) Ensuring the student can properly identify good operating techniques
- 4) Showing the student how to properly design a test area
